	Topic Ove In Summer learn abo preparing Big Bangl complete c themed close	r 2, we will extend children's learning and will consider the world beyond the place and planet where rout space, space travel and planets alongside lots of fact finding. Part of this term will also be spent talking for Year 1 and supporting the children with the transition into Year 1. Tuesday 4 th June - We will welcome your child into Space! We will be holding a space day where all wil challenges and collect space stamps so that they are prepared for a space adventure. We invite your chil othes; this could include NASA t-shirts, astronaut dress up, Buzz Lightyear costumes or feel free to get cr	ng about and l need to ld to wear space
		<u>Our Learning Overview</u>	
	Literacy	Through the stories that we use as key texts, children will have opportunites to get to know the stories and then to adapt them so they can create their own story. They will need to recall the meaning of the words character, setting, problem, solution as key components within all stories. The children will be writing their own captions, speech bubbles and sentences based around their new stories.	Key Texts
Reach for the Stars		Children will be able to revisit comparing length, weight, height and capacity and recall the vocabulary we use when measuring and comparing. We will revisit patterns, creating and extending repeating patterns and symmetrical patterns. We will also consolidate the children's knowledge of number bonds and compostion of numbers to 10. We will also be sharing and grouping amounts.	
	Understanding the World	Children will be learning about how people have travelled to space. We will watch the first moon landing and find out who is able to visit space. Learning about astronauts will provide us with an opportunity to talk about other roles and jobs that people do. Through pictures and videos, we will compare the moon with Earth.	Buck Handred Territoria
Be	Expressive Art and Design	We will use everyday materials to build our own spaceships and will look at images of some real spaceships so that we know what to inlcude. There will be role play opportunites through a role play spaceship where children will be welcome to create stories around space travel. They will also be able to describe the place they see when they are visiting space' in their stories.	a JTAR WING ORY
	Physical Development	Children will get creative using the 'Reach for the Stars' topic as inspiration. We will make their own rocket ships on a small and large scale. Using the 'Supertato' story as a stimulus, children will make their own vegetable superhero vegetables. We will continue to develop fine motor control through using one handed equipment when making these items, like tweezers, scissors, cotton buds, tongs and so on.	*. Helen Oxenbury
